DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-28** are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding **claim 1**, Cotreau (United States Patent 5,517,565) and Apfel (United States Patent Application Publication 2004/0174985), disclose a subscriber-line interface circuitry (SLIC) for connecting customer premises equipment (CPE) to a telecommunications network via a tip-and-ring line pair, comprising: audio-feeding circuitry adapted to transmit and receive audio signals to and from the CPE via the tip and ring lines; and ringing circuitry adapted to provide a ringing signal to the CPE via the ring line, wherein: an output side of the audio-feeding circuitry includes a tip amplifier adapted to be connected to the tip line; however, the prior art of record fails to disclose or fairly suggest wherein the SLIC is adapted to return the ringing signal from the CPE via the tip line and through the tip amplifier.

Regarding **claim 15**, Cotreau and Apfel disclose a method for interfacing with customer premises equipment (CPE) via a tip-and-ring line pair, comprising: providing a ringing signal to the CPE via the ring line; and receiving the ringing signal from the CPE via the tip line, however, the prior art of record fails to disclose or fairly suggest wherein the ringing signal is returned through a tip amplifier of subscriber-line interface circuitry (SLIC) of the telecommunications network.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
